

Executive Summary

This report summarises the software vulnerability landscape for devices within the scope of the defined report criteria. It outlines vulnerability distribution by severity and asset criticality, highlights the most common and highest-risk vulnerabilities, and identifies the most affected operating systems and services. The findings provide a clear view of where vulnerabilities exist and how they are concentrated across the infrastructure.

Detailed Report

4,280

Total Devices

↗ 78.5% from 31 August 2025

3,737

Scanned Devices within 30 days

↘ 4% from 31 August 2025

1,322

Total Vulnerable Devices

↘ 2% from 31 August 2025

2,150

Total Vulnerability Findings

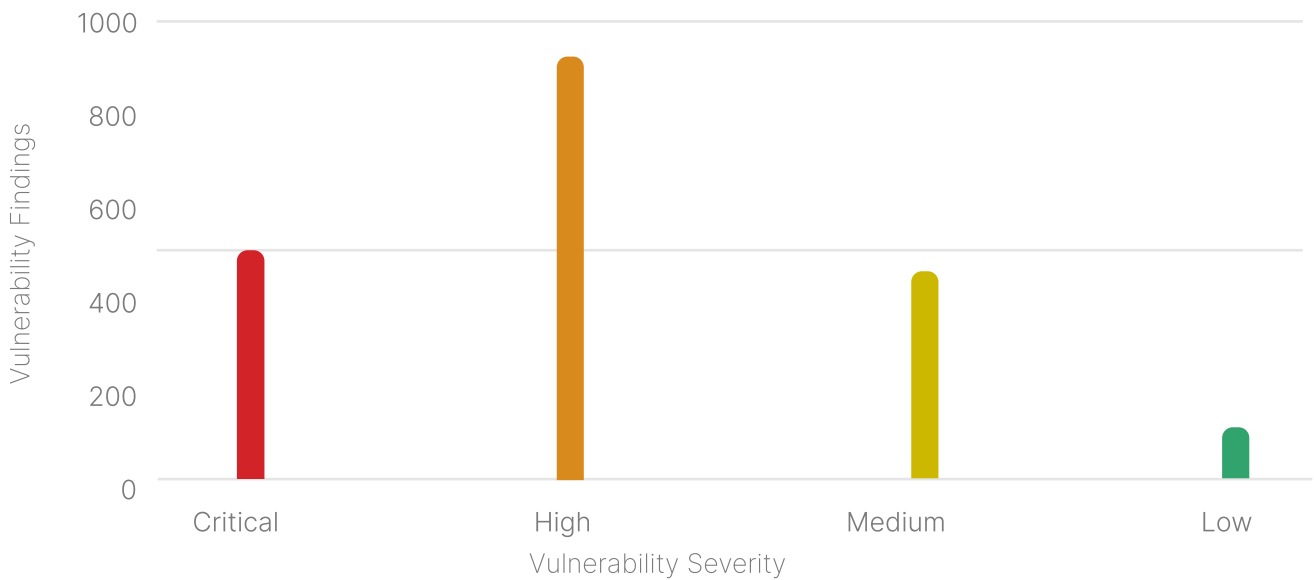

↗ 4% from 31 August 2025

1,746

Total Vulnerabilities

↗ 8% from 31 August 2025

Vulnerability Findings by Vulnerability Severity

Total Vulnerability Findings 2,150

Out of which the distribution is as follows:

- Critical

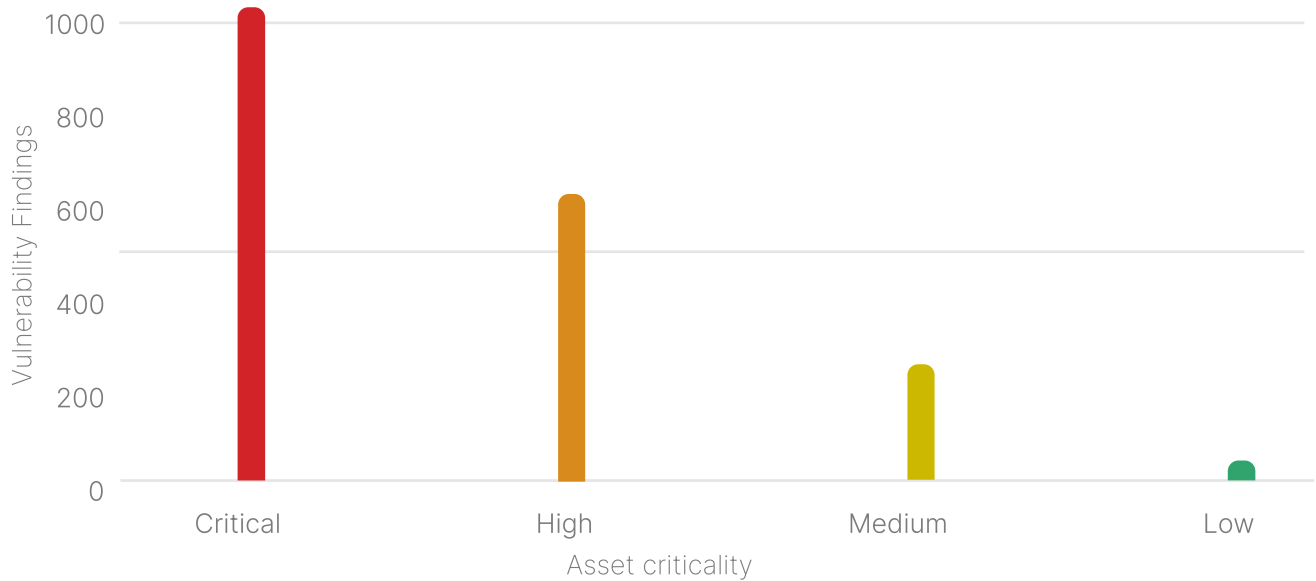

556
- High

934
- Medium

530
- Low

130

Vulnerability Findings by Asset Criticality

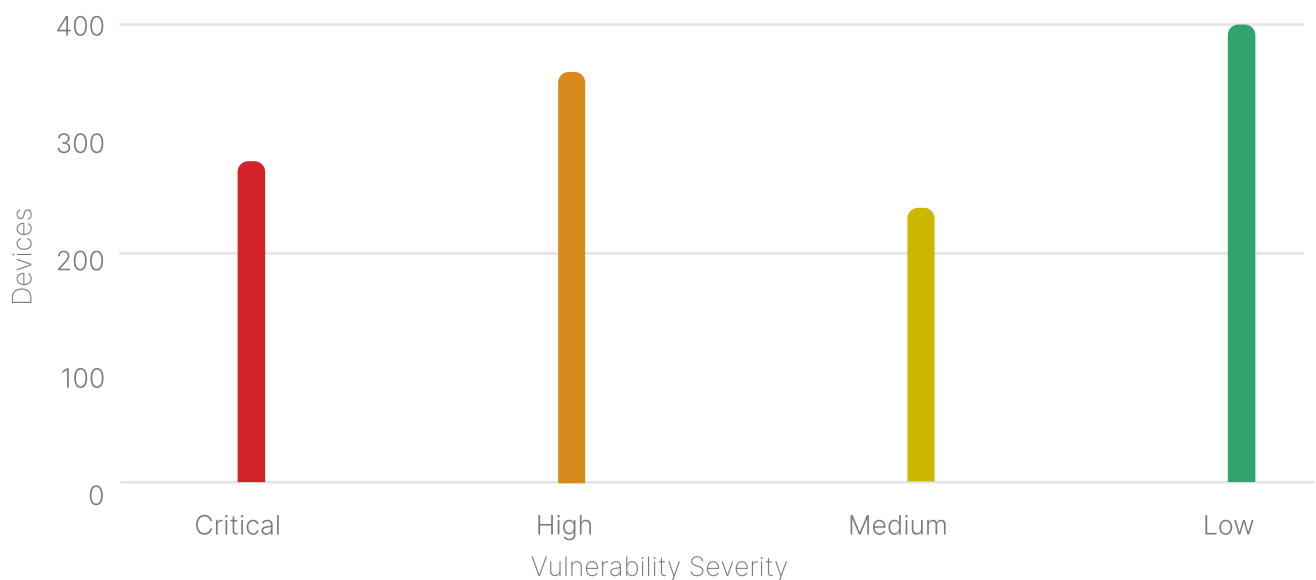

Total Vulnerability Findings 2,150

Distribution of vulnerability findings on devices grouped by asset criticality is as follows:

● Critical 1,115 ● High 613 ● Medium 352 ● Low 70

Devices by Vulnerability Severity

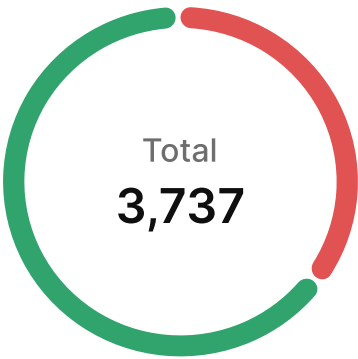

Total Vulnerable Device Occurrences by Severity 1,322

Represents total device severity combinations, not unique devices.

● Critical 297 ● High 375 ● Medium 250 ● Low 400

Vulnerable Devices

Total Devices 3,737

Vulnerable Devices have one or more unresolved ("Open") Vulnerability Findings.

Note: If a filter for any Vulnerability-related field has been applied to the Report, the scope of Devices changes to be those that currently or previously had Vulnerability Findings matching the filter criteria. This includes both Open and Closed Findings, unless Finding Status is specifically filtered for.

Vulnerable	1,322	35%
Non-Vulnerable	2,415	65%

Host SLA Breach Status by Asset Type

Breaching indicates that at least one open vulnerability finding on the host has exceeded the SLA timeline. Non-Breaching indicates that, although vulnerabilities are still open, none have breached SLA timeline.

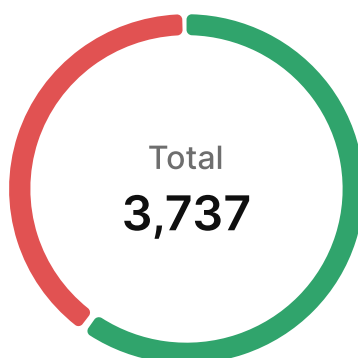

Asset Type	Non-Breaching	Breaching	Total
Server	15 (33.33%)	5 (11.11%)	20 (44.44%)
Workstation	7 (15.56%)	3 (6.67%)	10 (22.23%)
Network Devices	13 (28.89%)	2 (4.44%)	15 (33.33%)
Total Devices	35 (77.78%)	10 (22.22%)	45 (100%)

Vulnerability Findings SLA Timeline by Vulnerability Severity

Counts shown here include only findings with a defined SLA and may differ from Total Vulnerability Findings, which include both SLA and non-SLA findings.

Severity	Breaching	Over halfway	Under halfway	Total
Critical	480 (22.33%)	100 (4.65%)	160 (7.44%)	740 (34.42%)
High	225 (10.47%)	85 (3.95%)	210 (9.77%)	520 (24.19%)
Medium	490 (22.79%)	90 (4.19%)	140 (6.51%)	720 (33.49%)
Low	70 (3.26%)	55 (2.56%)	45 (2.09%)	170 (7.91%)
Total Vulnerability Findings	1,265 (58.84%)	330 (15.35%)	555 (25.81%)	2,150 (100%)

Known Exploit Availability

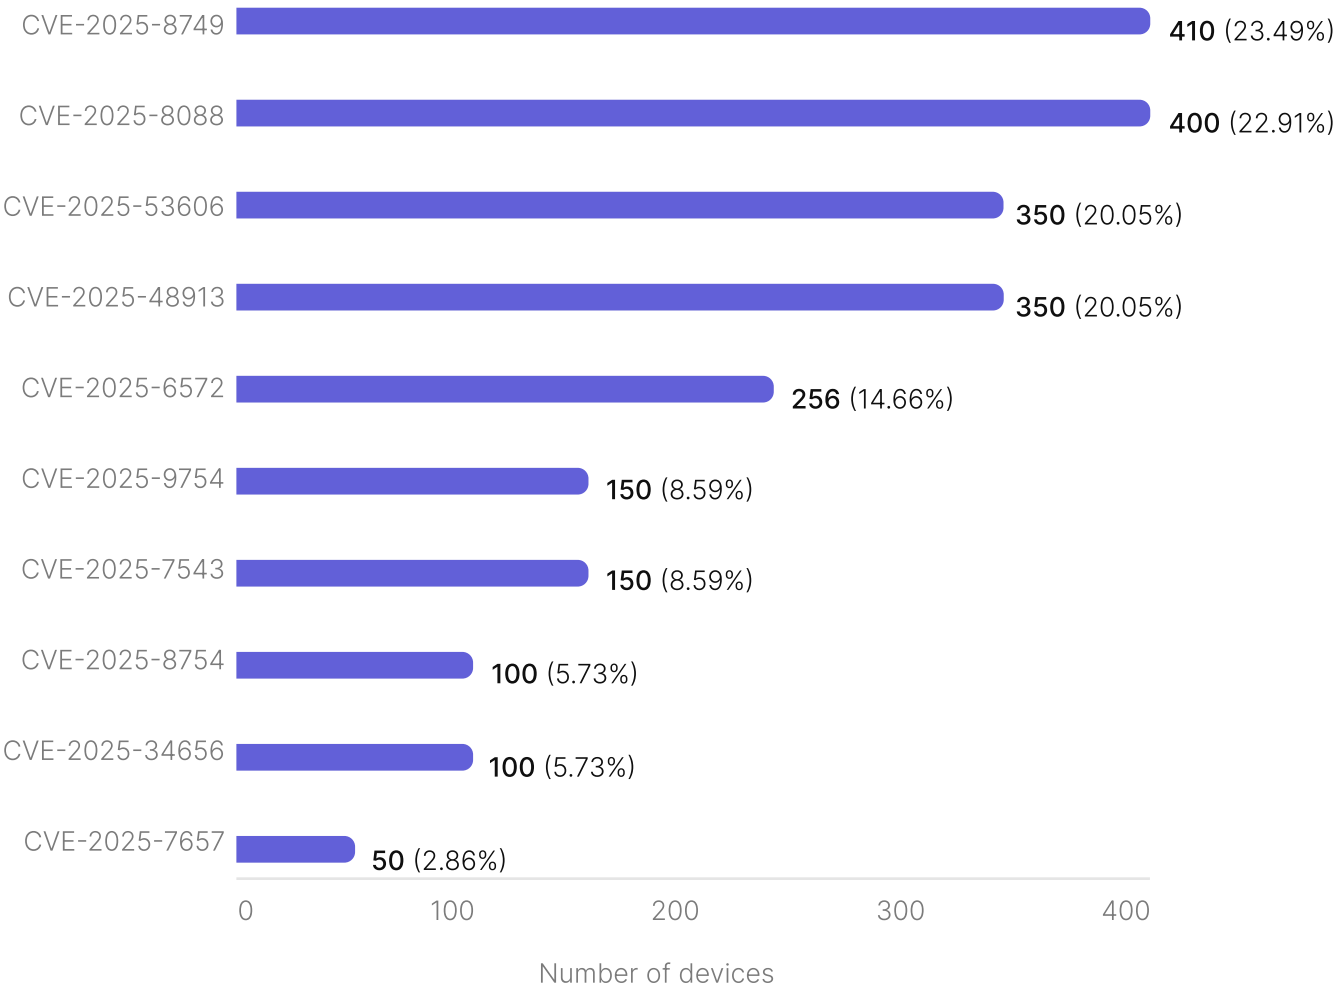

Total Vulnerabilities 3,737

True indicates a known exploit is available, while **False** indicates no known exploit is available.

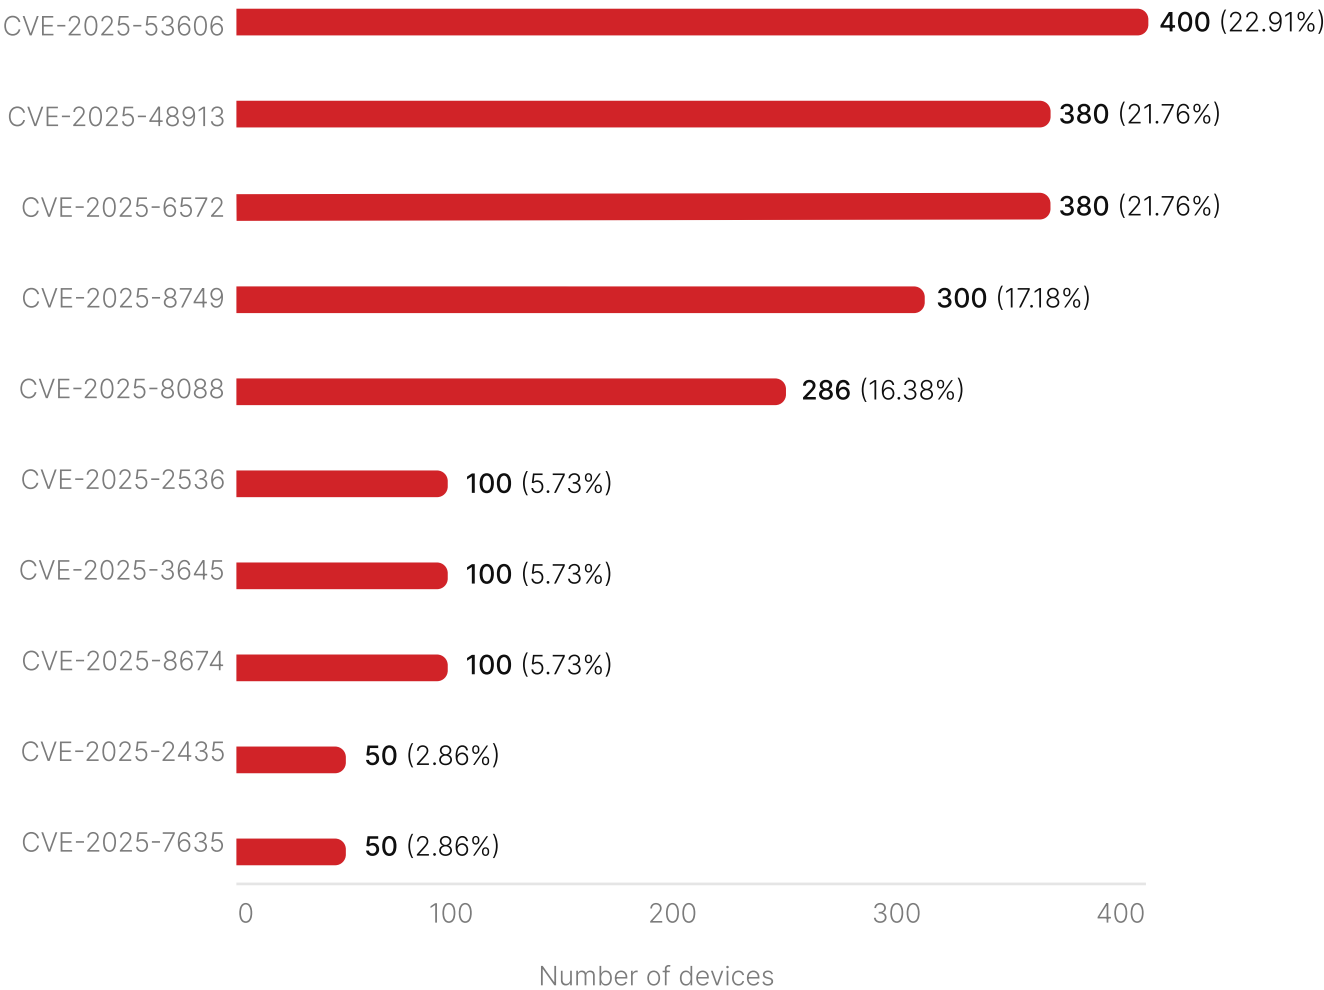

False	2,541	70%
True	1,196	30%

Top 10 Most Common Vulnerabilities

Out of 1,746 vulnerabilities, **CVE-2025-8749** is the most common, affecting **410 (23.49%)** of vulnerable devices.

Top 10 Most Common Critical Vulnerabilities

Out of 1,746 Critical Vulnerabilities, **CVE-2025-53606** is the most common, affecting **400 (22.91%)** of vulnerable devices.

Top 10 Most Common Vulnerability Categories by Vulnerability Findings

Category	Count of Vulnerability Findings (%)
Palo Alto Networks	700 (32.56%)
Palo Alto Networks GlobalProtect App	400 (18.60%)
CVSS Score Predicted with Rapid7 AI	250 (11.63%)
Privilege Escalation	150 (6.98%)
PAN-OS	80 (3.72%)
Web	20 (0.93%)
Denial of Service	7 (0.33%)
Information Gathering	5 (0.23%)
Network	3 (0.14%)
SSH	2 (0.09%)
Total	1,617 (75.26%)

Out of 543 vulnerability categories, top 10 most common vulnerability categories account for **1,617 (75.26%)** of the **2,150** total vulnerability findings.

Top 10 Most Common Vulnerability Categories by Vulnerabilities

Category	Count of Vulnerabilities (%)
Palo Alto Networks	300 (17.17%)
Palo Alto Networks GlobalProtect App	200 (11.45%)
CVSS Score Predicted with Rapid7 AI	150 (8.59%)
Privilege Escalation	120 (6.87%)
PAN-OS	80 (4.58%)
Web	60 (3.44%)
Denial of Service	50 (2.86%)
Information Gathering	25 (1.43%)
Network	15 (0.86%)
SSH	13 (0.74%)
Total	1,013 (58%)

Out of 543 vulnerability categories, top 10 most common vulnerability categories account for **1,013 (58%)** of the **1,746** total vulnerabilities.

Top 10 Most Common Vulnerable Operating Systems by Vulnerability Findings

OS	Count of Vulnerability Findings (%)
Apple Mac OS X	386 (17.95%)
Cisco IOS	295 (13.72%)
Palo Alto Networks PAN-OS	241 (11.21%)
Palo Alto Networks GlobalProtect App	191 (8.88%)
Privilege Escalation	155 (7.21%)
Web	135 (6.28%)
Denial of Service	115 (5.35%)
Information Gathering	96 (4.47%)
Network	86 (4.00%)
SSH	84 (3.91%)
Total	1,784 (82.98%)

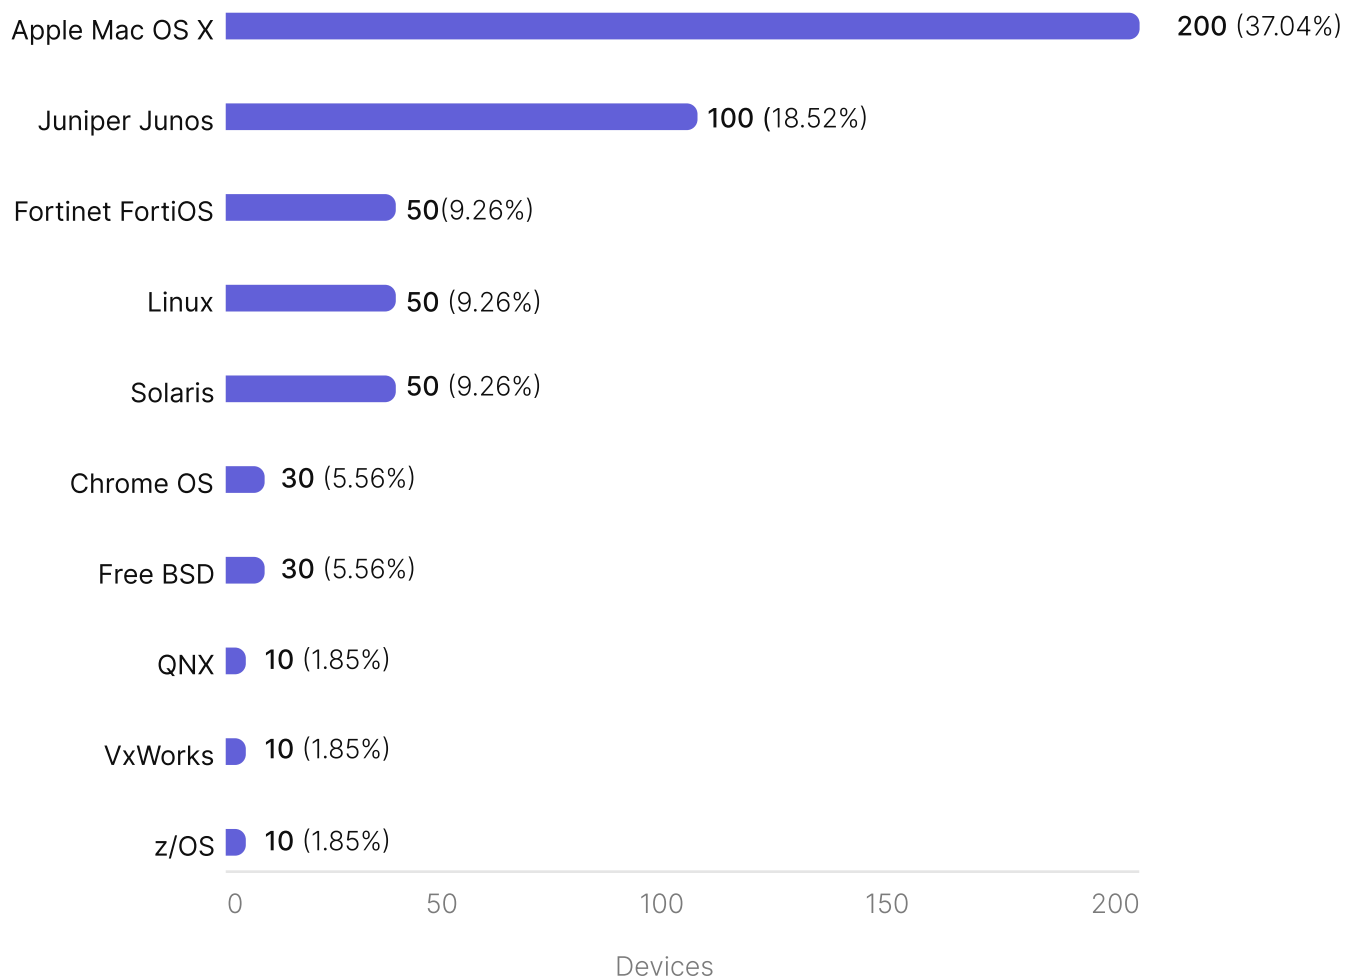

Out of 1,322 vulnerable operating systems, top 10 most common vulnerable operating systems account for **1,784 (82.98%)** of the **2,150** total vulnerability findings.

Top 10 Most Common Vulnerable Operating Systems by Vulnerabilities

OS	Count of Vulnerabilities (%)
Apple Mac OS X	290 (16.61%)
Cisco IOS	210 (12.031%)
Palo Alto Networks PAN-OS	170 (9.74%)
Palo Alto Networks GlobalProtect App	140 (8.02%)
Privilege Escalation	120 (6.87%)
Web	100 (5.73%)
Denial of Service	80 (4.58%)
Information Gathering	75 (4.29%)
Network	72 (4.12%)
SSH	70 (4.01%)
Total	1,327 (76%)

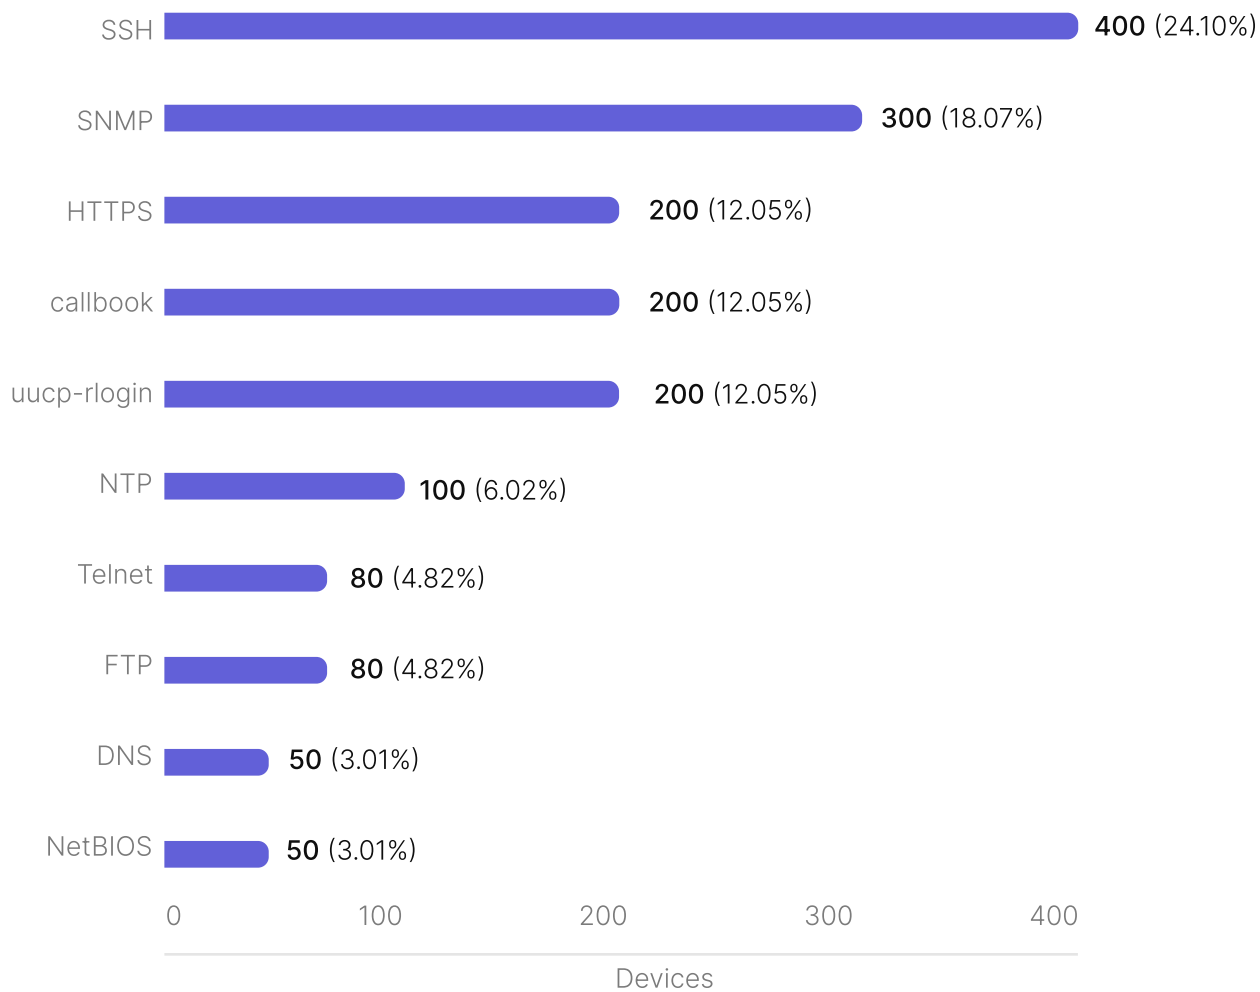

Out of 1,322 vulnerable operating systems, top 10 most common vulnerable operating systems account for **1,327 (76%)** of the **1,746** total vulnerabilities.

Top 10 Most Common Operating Systems

Apple Mac OS X is the dominant operating system accounting for **200 (37.04%)** of total vulnerable devices.

Top 10 Most Common Services

SSH is the most common service running for about **400 (24.10%)** of total vulnerable devices.
